DETAILED ACTION

In view of Decision on Appeal submitted by BPAI on 10 October 2008, the claimed subject matters are further distinctly pointed out as patentable features to place the application in the condition for allowance.

Terminal Disclaimer

The terminal disclaimer filed on 4 November 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration dates of the full statutory term of the patent granted on pending reference Application Number 09/931,550 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 1 – 4 and 6 – 10 are allowed.

The following is an examiner's statement of reasons for allowance:

The above mentioned claims are allowable over prior arts because the CPA (Cited Prior Art) of record fails to teach or render obvious the claimed limitations in combination with the specific added limitations recited in claims 1, 4 and 8 (& associated dependent claims).

The present invention is directed to a method for updating a program in a data processing that comprises modifying the program with the update to the program in response to the unlocking of the memory unit storing the program. The closest prior arts on the record, either singularly or in combination fails to anticipate or render obvious the claimed invention of the TPM performing the signature verification of the update to the program and if the signature

verification of the update to the program is successful, unlocking a memory unit storing the program according to the board decision submitted by BPAI.
